Experience

Software Developer

I am working on Flutter Language. Develop interactive, user-friendly interfaces using Flutter.

The Baap Company

Enterprise Resource Planning (ERP)

I work in ERP Project. The ERP Means (Enterprise resource Planning) is a Software System that help you to run your Entire business, supporting automation and processes in finance, human resources, manufacturing , supply chain, services, procurement, and more. In this project I work on Transport Module. In Transport Module I work on UI and Integration.

The Baap Company

Baap Transport

I Transport App is a mobile app designed to facilitate planning, booking and management of transport services. It typically allows users to track available transport options such as taxis, buses, their vehicles and make payments directly through the app.

The Baap Company

SalesMan-App:

A salesman app is a mobile application tailored for sales professionals to manage their sales activities efficiently. The app typically includes features for tracking leads, managing orders, and running campaigns.

The Baap Company

Baap-Wallet

A wallet app is a mobile application that allows users to store, manage, and use digital versions of their payment methods, such as credit cards, debit cards, and digital currencies. It typically includes features for making secure payments in stores, online, and within apps. Users can also store loyalty cards, tickets, and coupons in the app, making it a convenient all-in-one solution for managing finances and purchases.
